Dear Ms. Kobaitri,

I am responding to the job posted on Dice.Com for the position of Web Designer. With over 4 years of experience as a Web Designer and meeting all the requirements, I believe I am well qualified for this position.

My past job experience as an Internet Marketer has developed me into an experienced web designer with a good control and proficiency over programming language such as the HTML, styling sheet CSS as well as basics of server side programming language PHP and client side Javascript. After becoming an Internet Marketing specialist, I was in control of the company's web management, overseeing the company's main website, creating blogs on content management platform such as the Wordpress and Joomla, social media and analyzing the company's online needs and performance.

Since graduating from High School and currently as a university student, I have completed many independent web projects, most notably designing a website for the non-profit organization 5000 Role Models of Miami-Dade County Public schools.

Apart from being a Web Designer, I have the skills of designing graphics such as logo, edit photos, and design brochures using the Adobe Photoshop CS4 that may be useful in this position. My ability to work well under pressure has prepared me well for fast paced work environments.

Currently, I am a student majoring in Computer Science at Florida International University where I am taking courses in computer programming, database management, and data mining.

If my skills and background meet your needs, please contact me at (786) 8683-2440 or email me at miamibeach2009@gmail.com.

Thanks for your time and consideration.
Sincerely,

Mansur Hussain
